

Garrett Morgan

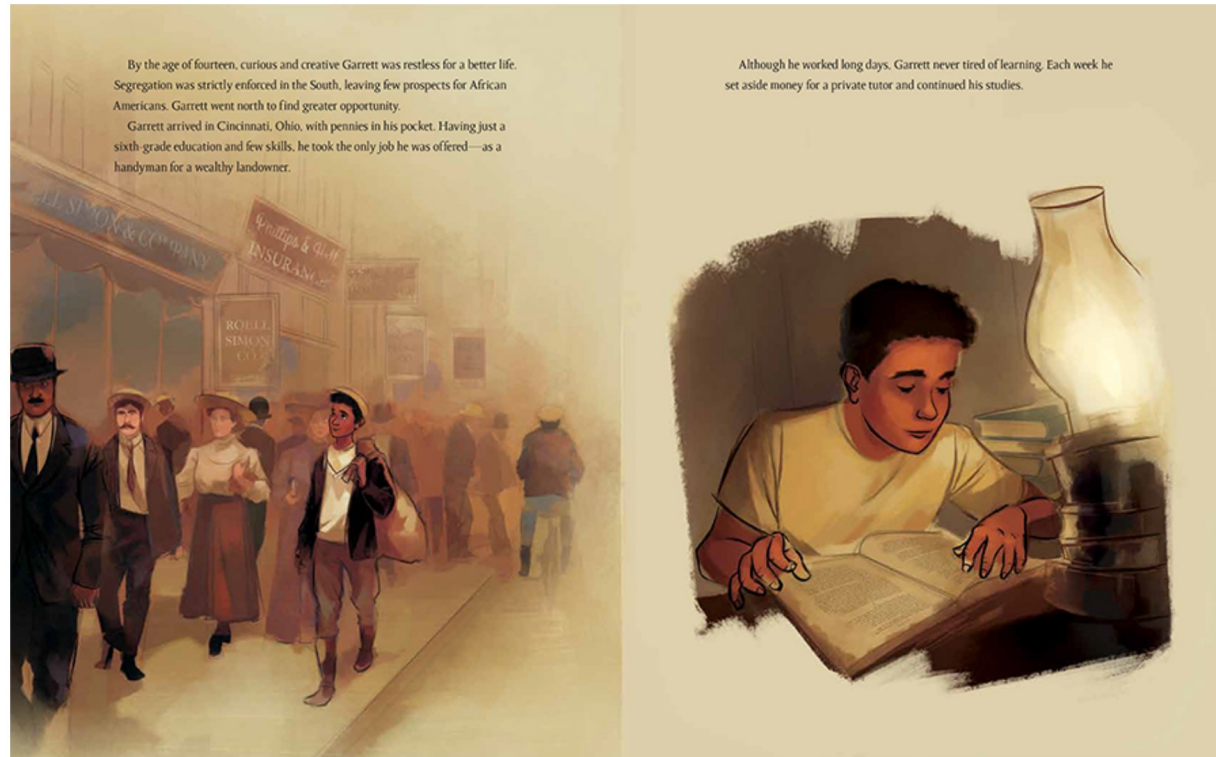

Mr. Morgan was born over 100 years ago.

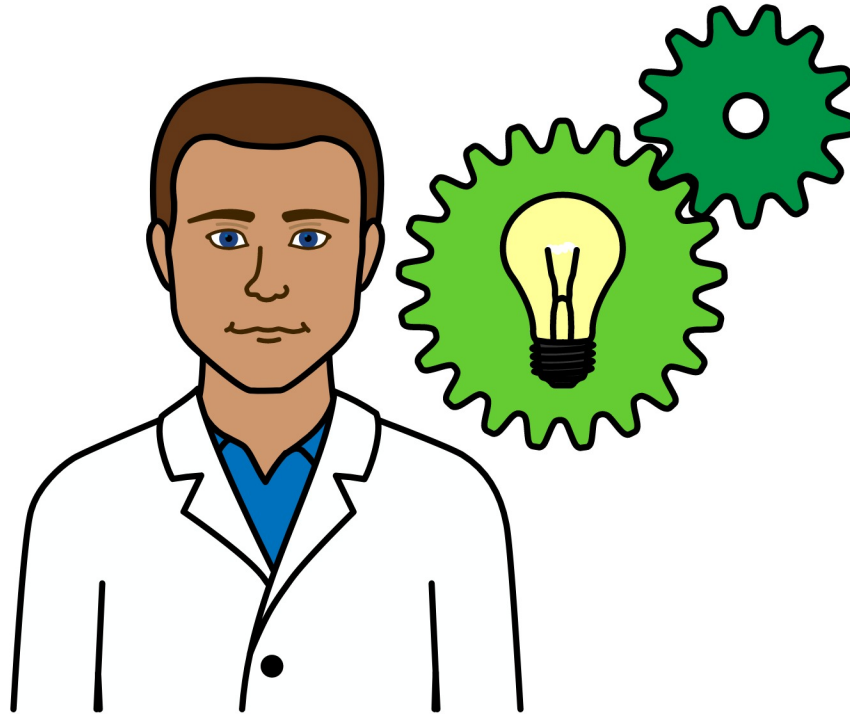

People were mean to him because he was black.

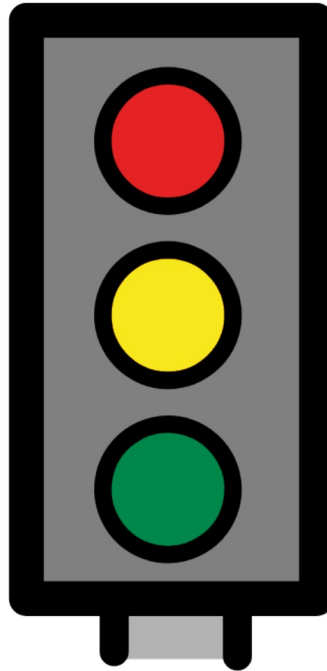

That is called racism and it is NOT ok!

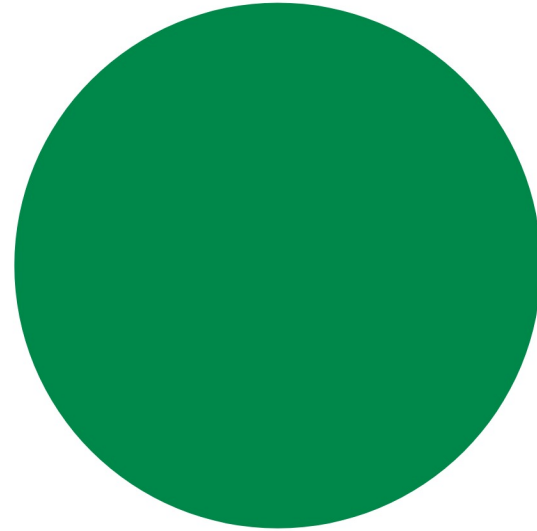

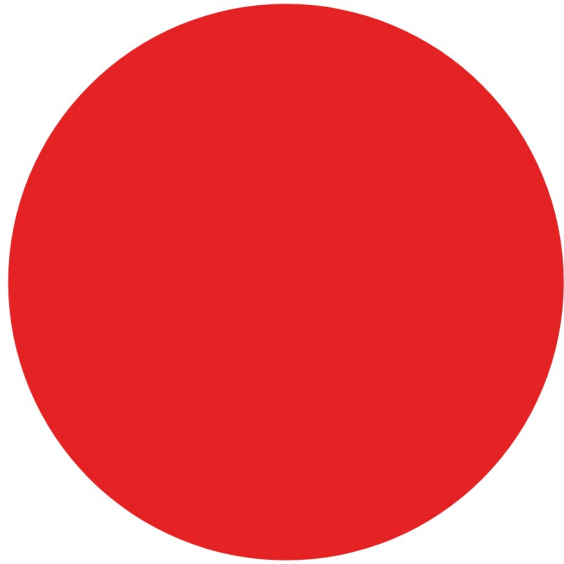

Mr. Morgan worked very hard.

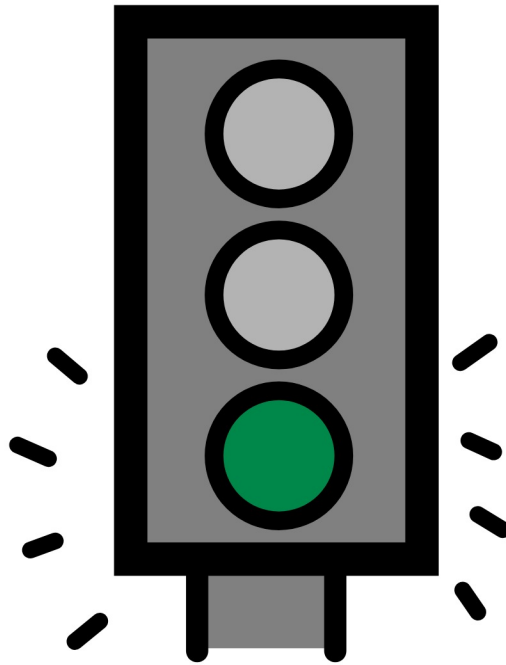

He was the first person to make a lot of different things.

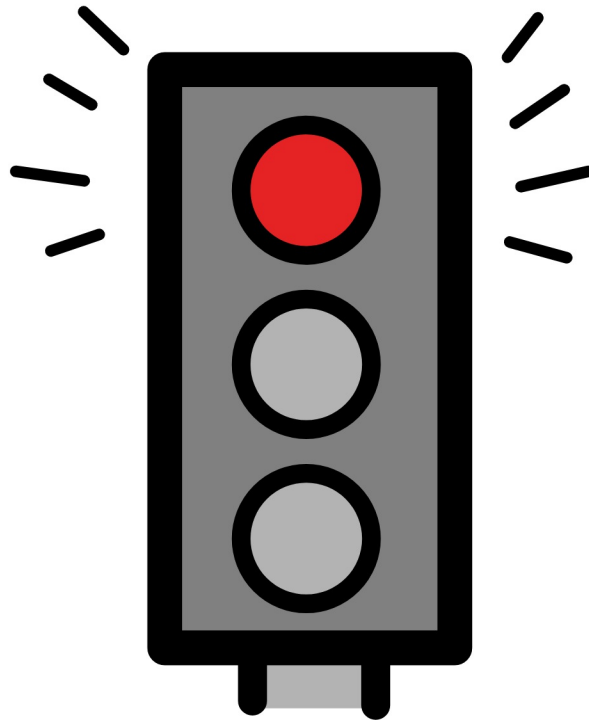

One thing he made was the traffic light.

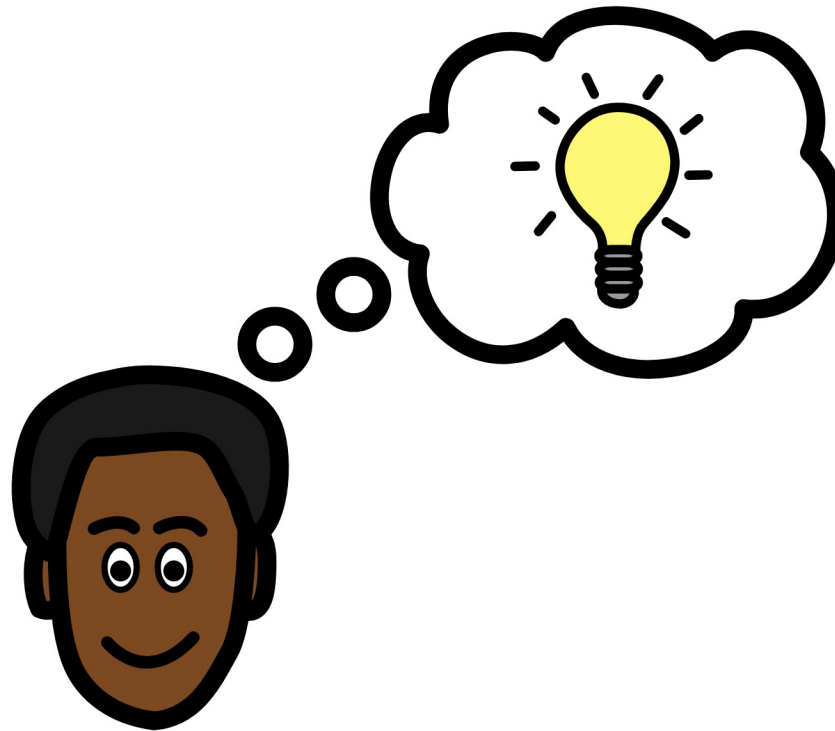

First the traffic light only had 2 colors, red
and green.

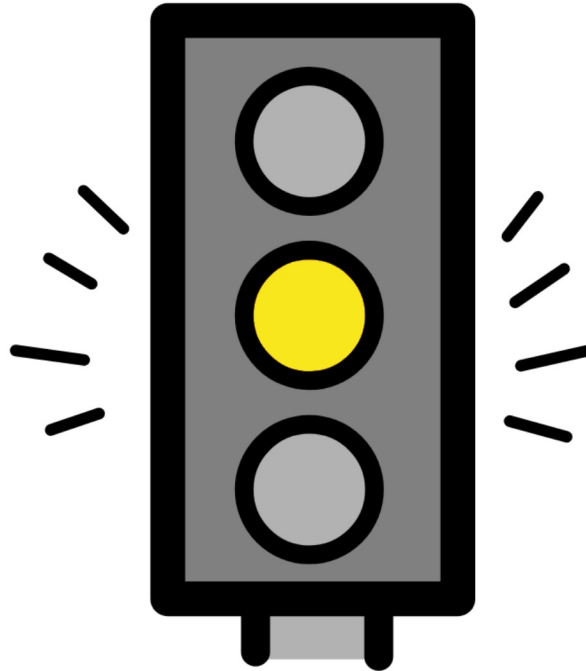

When we see a green light, we can GO!

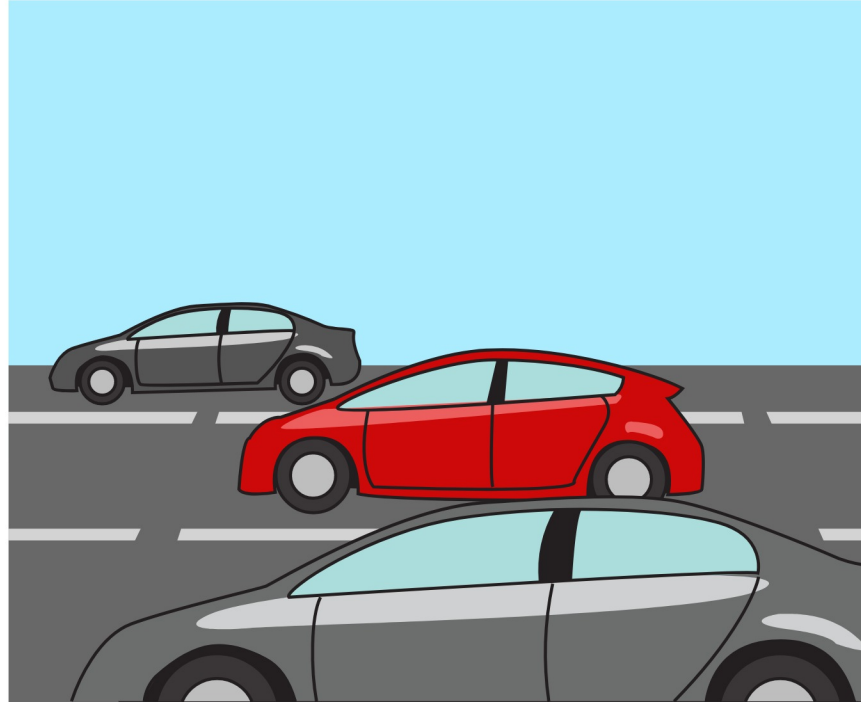

When we see a red light, we STOP!

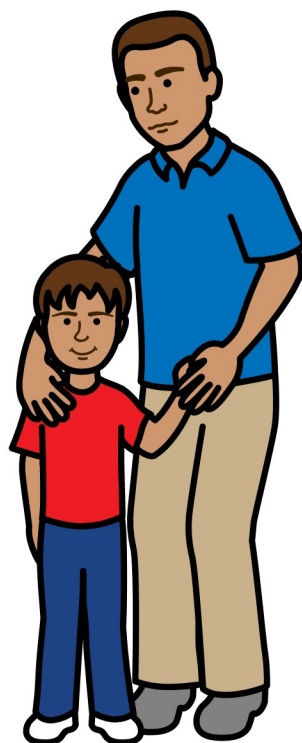

But how will people know when to slow down? Mr. Morgan had an idea!

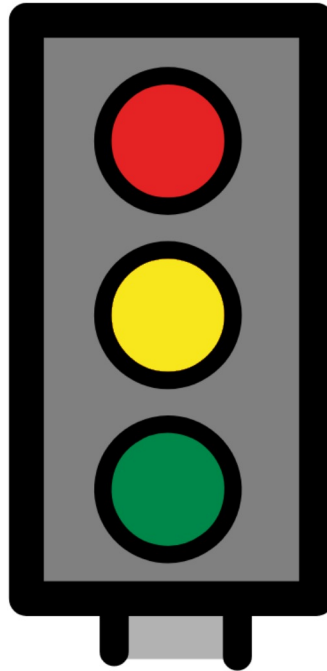

He added a yellow light to tell people it was time to slow down.

The yellow light helps tell people it's time to slow down when driving their car.

Slowing down before you stop helps to keep
us safe.

Now the traffic light has 3 colors, red, yellow and green.

Thank you Mr. Morgan for helping keep us
safe!
